

Suyash Ranjan Sinha

Full Stack Java Developer

 suyash.sinha.104@gmail.com  +91-7070747693  [Suyash Sinha](#)  [Suyash Sinha](#)  Patna, India  [Portfolio](#)

PROFESSIONAL EXPERIENCE

Intern, Oil and Natural Gas Corporation Limited (ONGC) 06/2026 – 07/2026

- Developed a RAG-based chatbot using **Python**, **LangChain**, **ChromaDB**, and **LLMs** for intelligent document question answering.
- Processed ONGC documents using **PDF parsing**, **text chunking**, and **embedding models**.
- Implemented semantic search with a **vector database** to retrieve relevant document context.
- Integrated the retrieval pipeline with an **LLM** to generate accurate, context-aware responses.
- Built a backend using **FastAPI** and optimized prompts to improve response quality.

EDUCATION

Bachelors of Technology, Birla Institute of Technology, Mesra 09/2023 – Present

B.Tech in Electronics and Communication Engineering which current Sgpa-8.48 | Cgpa-7.8

SKILLS

Technical Skills

Language: Java, C, C++, Python, Javascript

Web Development: HTML, CSS, Node.js, FastAPI

Frameworks & Tools: Spring Boot, Git, Arduino IDE, Docker, JWT Authentication

AI/ML: Retrieval-Augmented Generation (RAG), Large Language Models (LLMs), Prompt Engineering, Vector Databases, Semantic Search

Databases: MongoDB, MySQL

Core Concepts: Data Structures & Algorithms, OOP

Embedded Systems: Arduino, Sensors Integration

PROJECTS

Enterprise KPI & Goal Management Portal, Atomberg - 48hr Hackathon , 05/2026 – 05/2026

React.js, Spring Boot, MySQL, Tailwind CSS & JWT Authentication

- Built a full-stack enterprise KPI management platform supporting Employee, Manager, and Admin workflows.
- Developed secure JWT-based authentication and role-based authorization using Spring Security.
- Implemented quarterly goal tracking, manager approval/rework workflows, governance analytics, and KPI dashboards.
- Designed responsive UI with React, Tailwind CSS, Framer Motion, and Recharts.
- Integrated REST APIs with MySQL database and deployed frontend/backend using Vercel and Railway/Render.

Vehicle-Insight-Orchestrator , **Agentic AI - Predictive Maintenance System | EY Techathon 6.0** 10/2025 – 01/2026

- Designed and implemented a real-time data ingestion pipeline for vehicle and user events.
- Built behavior analytics and basic UEBA logic to detect anomalies and unusual patterns.
- Developed RESTful APIs for secure data exchange between frontend and backend.
- Created interactive dashboards for live insights, alerts, and activity visualization.
- Integrated authentication and session-based user flow for seamless customer engagement.

MINI PROJECTS

- Netflix UI - Html, CSS, JavaScript
- Voice Controlled Home Automation System and Obstacle Detection Radar System
- Smart-Health-Surveillance, Smart India Hackathon 2025
- Currency Converter Website, API integration
- Brick Breaker Game - Java Swing
- IoT-Based Real-Time Health Monitoring using ESP32 & Firebase

PARTICIPATION AND CERTIFICATES

EY Techathon  10/2025 – 01/2026

Cleared Round 1 of **EY Techathon 6.0 (EY)** – National-level hackathon.

Smart India Hackathon, 2025 09/2025 – 10/2025

National-level hackathon - 2025
